

Swiss Household Energy Demand Survey (SHEDS), Wave 2020

Questionnaire and codes

Last update: 03.07.2020

Preliminary notes

This document contains all questions and codes for wave 2020 of the Swiss Household Energy Demand Survey (SHEDS). The related datasets are named SHEDS2020.xyz.

Conventions:

- Variable names are written in **bold**.
- For questions coded in several variables, a suffix **_n** (n = 1, 2, ..., N) is appended to differentiate items. Suffixes are indicated in brackets [].
- Response codes are indicated in parentheses ().
- In questions where a single answer is possible, choices appear with a circle "○".
- In questions where multiple answers are possible, choices appear with a square "□".
- Text **shaded in grey** provide additional indications that were not shown to the respondents.
- Negative values indicate special types of missing values. In particular:
 - -1 = does not know (labelled dnk)
 - -2 = does not apply (labelled dna): the question is irrelevant, and hence not displayed to the respondent
- Questions that have marginally changed over the years are appended with a final letter to emphasize the change and prevent any unnoticed mistake when merging different waves. For example, **accom2** in 2016 has been changed to **accom2a** since 2017 because house (**accom2** = 1) has been split to detached house (**accom2a** = 5), semi-detached house (**accom2a** = 6) and terraced house (**accom2a** = 7). In the same spirit, codes of the old variable that were changed (e.g., 1 in **accom2**) are not reused in the new variable.
- The questions are listed in the same order they appear for the respondents during the survey. Numbering of questions is thus not always in a natural order.
- New respondents (i.e. those who did not answer any of the previous waves) and returning respondents (who did answer previous waves) are identified by the variable **old**:
 - 0 = new respondent, who never answered SHEDS before current wave
 - 1 = returning respondent, last wave answered = 2016
 - 2 = returning respondent, last wave answered = 2017
 - 3 = returning respondent, last wave answered = 2018
 - 4 = returning respondent, last wave answered = 2019
- Three different choice experiments were conducted on returning respondents. Each respondent was assigned a single choice experiment, as indicated by the variable **group_ce**:

1. PED (responsible group: UniBas)
2. IST (responsible group: UniNe)
3. PPS (responsible group: ZHAW)

The data relative to the choice experiments are excluded from the main database and provided in secondary databases, as indicated at the beginning of each dedicated section. The link between the main database and the secondary databases can be done using the respondents' **id**.

- The original questionnaire in English, German and French, with all original codes, display logic, and survey flow directly extracted from Qualtrics is available in document SHEDS2020_OriginalQuestionnaireFromQualtrics_EN+FR+DE.docx. Note that some codes displayed in these technical documents may differ from those in the datasets released since some variables have been transformed. In the event of any divergence, the present document shall prevail.
- The respondents who answered the questionnaire completely are identified by variable **finished**. Note that only respondents with finished = 1 are considered by Intervista in the quotas. The incomplete answers are still provided (in datasets named SHEDS2020_incomplete.xyz) and should be used only with caution.

Interview data (from Qualtrics)

id	Respondent's ID number (from 2 to 15531)
old	Respondent's cohort in SHEDS: 0 = new respondent, who never answered SHEDS before current wave 1 = returning respondent, last wave answered = 2016 2 = returning respondent, last wave answered = 2017 3 = returning respondent, last wave answered = 2018 4 = returning respondent, last wave answered = 2019
every_2nd_year	Indicator defined in survey flow for respondents who have to be submitted to questions asked every 2 nd year: 0 if old is 4 1 if old is 0, 1, 2, 3, 4
last_wave_answered	Year of last wave answered defined in survey flow to facilitate display of some questions: 0 if old is 0 2016 if old is 1 2017 if old is 2 2018 if old is 3 2019 if old is 4
time_since_last_wave	Time elapsed since the last wave answered by the respondent (displayed in some questions): four years if old = 1 three years if old = 2 two years if old = 3 12 months if old = 4
group_ce	Indicator for the choice experiment group 1 = PED (responsible group: UniBas) 2 = IST (responsible group: UniNe) 3 = PPS (responsible group: ZHAW)
q_language	Language used by respondent during the questionnaire DE = German EN = English FR = French
q_totalduration	Duration of questionnaire (in minutes)
duration_hms	Duration in format HH:MM:SS
start	Date and time when questionnaire was started by respondent (format: DDMMYYYY hh:mm:ss)

time_ce	Date and time recorded after Choice experiment PED/IST/PPS (format DD.MM.YYYY hh:mm:ss)
end	Date and time when questionnaire was ended by respondent (format: DDMMYYYY hh:mm:ss)
finished	Indicator for questionnaire completely (1) or incompletely (0) answered.

Master data (from Intervista)

These variables are available for respondents who were not screened out (**screen ≠ 3**)

age	<p>Respondent's age (in years, Intervista)</p> <p>Because the evolution of age is not always consistent across waves, one might want to correct age and enforce consistency. This seems particularly important for longitudinal analyses. To this end, variable age_corr has been created as follows:</p> <ol style="list-style-type: none"> 1. For respondents with more than two waves: check if two observations are consistent and adapt the other observations accordingly (if more than 3 waves, there might be several pairs of consistent observations; in such cases, the most recent pair is considered as being correct) 2. For respondents with two waves only or for respondents with more than two waves but rule 1 does not apply: consider the most recent observation as being correct and adapt the other observations accordingly

Welcome to the Swiss Household Energy Demand Survey (SHEDS) 2020

The *Swiss Household Energy Demand Survey* (SHEDS) has been developed as part of the research agenda of the Competence Center for Research in Energy, Society, and Transition (SCCER CREST), to analyze Swiss households' energy consumption and energy-related behaviors. SHEDS is carried out annually since 2016 on a sample of 5,000 respondents representative of the Swiss population (excluding Ticino).

Now that the restrictions to Covid-19 are steadily being lifted, we would like you to answer the questions in this survey thinking about what you would "normally" do, unless we ask you specifically to think about how it is now.

The complete questionnaire should take about **30 minutes**. It is possible to quit the survey and resume later. All your answers will be treated anonymously and confidentially. They will only be used for scientific analyses by academic researchers.

Your participation is highly appreciated.

Electricity (elec)

elec_intro

Electricity

The next part of the survey is related to your *electricity consumption*.

elec1

Which devices do you have in your accommodation for your private use?

Disregard public facilities of your building.

For each device 0 = no, 1 = yes.

- Fridge [_1]
- Freezer (separated from fridge) [_2]
- Microwave oven [_3]
- Oven [_28]
- Dishwasher [_4]
- Coffee machine [_5]
- Juice maker [_6]
- Food processor [_7]
- Steam cooker [_8]
- Washing machine [_9]
- Dryer [_10]
- Robot vacuum cleaner [_11]
- TV [_12]
- TV box [_13]
- Home theater system [_14]
- Internet router [_15]
- Desktop computer [_16]
- Laptop [_17]
- Tablet [_18]

- Infra-red electric heater [_20]
- Air conditioner [_21]
- Humidifier [_22]
- Sauna [_23]
- Solarium [_24]
- Jacuzzi [_25]
- Swimming pool [_26]
- Aquarium/Terrarium [_27]

elec2

How many of the following devices do you own?

Only the relevant choices (i.e., those ticked in **elec1**) are displayed to the respondent.

Device numbers in line with **elec1**.

	1 (1)	2 (2)	3 (3)	4 (4)	5 or more (5)
Fridge(s) [_1]	<input type="radio"/>				
Freezer(s) (separated from fridge) [_2]	<input type="radio"/>				
TV(s) [_12]	<input type="radio"/>				
Desktop computer(s) [_16]	<input type="radio"/>				
Laptop(s) [_17]	<input type="radio"/>				
Tablet(s) [_18]	<input type="radio"/>				

elec3

What is the energy label of your devices?

If you own several devices in the same category, consider the one you use the most.

Only the relevant choices (i.e., those ticked in **elec1**) are displayed to the respondent.

Device numbers in line with **elec1**.

	A+++ (1)	A++ (2)	A+ (3)	A (4)	B (5)	C or worse (6)	I do not know (-1)
Fridge [_1]	<input type="radio"/>						
Freezer (separated from fridge) [_2]	<input type="radio"/>						
Oven [_28]	<input type="radio"/>						
Dishwasher [_4]	<input type="radio"/>						
Washing machine [_9]	<input type="radio"/>						
Dryer [_10]	<input type="radio"/>

accom7

Does your accommodation conform with the *Minergie* standard or better standards?

- Yes (1)
- No (0)
- I do not know (-1)

accom8

Which of the following devices is your accommodation equipped with?

For each device 0 = no, 1 = yes.

- Photovoltaic solar panels (to produce electricity) [_1]
- Solar thermal panels (to produce hot water) [_2]
- Heat pump [_3]
- None [_4] (this answer is exclusive)
- I do not know [_5] (this answer is exclusive)

accom2d

Displayed if **accom_change** ≠ 0.

Change in SHEDS 2018: this question is asked to all (rather than to those who live in houses only).

What is the type of roof on your home or the house you live in?

- Flat roof (1)
- Gabled roof (2)
- I do not know (-1) (item introduced in SHEDS 2018)

accom2e

Question introduced in SHEDS 2018, and reformulated (notes added) in SHEDS 2019.

What is the type of façade of your home?

Notes:

- *A compact façade is generally speaking a façade with a plain brick or concrete wall with an external rendering and insulation.*
 - *A ventilated façade is a light façade composed of a wall made of claddings in metals or wood filled with the insulation material.*
- Not thermally insulated (only external painting/rendering) (3) (item introduced in SHEDS 2019)
 - Compact (1)
 - Ventilated (2)
 - I do not know (-1) (item introduced in SHEDS 2018)

accom3

Displayed if **accom_change** ≠ 0.

Since when do you live in your current accommodation?

Year of entry: _____ accepted range: 1920-2020

accom4a1

Displayed if **accom_change** ≠ 0 until 23.05.2020. Display logic then removed (and therefore question asked to all respondents) to avoid issues with comments displayed in renov1/2/3/4 (empty year).

Can you please tell us the year of construction of your building?

This value cannot be larger than the indicated year of entry in the accommodation (yyyy) (value from accom3).

- Year of construction: _____ (yyyy)
- I do not know (-1)

accom4a3

New in SHEDS 2020, but equivalent to **accom4a2**, except that year brackets were adapted. Displayed if **accom4a1** = -1.

Because the display logic of answer was based on accom3, which was not displayed to respondents with **accom_change** = 0, the answers are not valid for this group and therefore set to missing.

You said, you were not sure in which year your accommodation was constructed. Can you tell us an approximate time period?

Note that we have restricted the possible answers. Only years following the year of entry in your accommodation are displayed. As a reminder, you said that you moved into your current accommodation in yyyy (value from accom3). If this is not correct, please go back to that question and enter the right year.

- 2016-2020 (1)
- 2011-2015 (2)
- 2006-2010 (3)
- 2001-2005 (4)

Energy and non-energy related investments

In this section of the survey, we will focus on energy and non-energy related investment options. We will focus on the building you are currently living in.

We want to understand your perceptions of different investment choices. The information that we collect will be used to inform Swiss energy policymakers. Therefore, it is important that your answers reflect your specific situation and personal tastes.

In particular, some of the following questions will involve costs to your own household; please give careful consideration to how these costs would affect your financial budget.
